

NORWATT SL

GENERAL ENVIRONMENTAL PERFORMANCE REPORTING

Norwatt, in its commitment to the conservation, respect and protection of the environment, has established an Environmental Policy which can be consulted in our certificates section.

Norwatt evidences compliance, identification and review of the legal requirements established for its activity.

The implementation of this system in the organisation has helped to improve our environmental performance on an annual basis through the establishment of a series of improvement objectives.

Norwatt's objectives are analysed in the External Audits carried out with AENOR on an annual basis.
