Reliability inside

ALCAD

ADVANCED SOLUTIONS | ENGINEERING EXCELLENCE

Alcad Single Cell Range

the reliability you need at the heart of your power backup system

Versatility for industry

Alcad Single Cell nickel-cadmium (Ni-Cd) batteries offer the versatility to industry where reliable performance is crucial, even under extreme operating conditions, for example in :

- substations
- power plants
- onshore and offshore oil & gas applications
- refineries
- airports
- building infrastructure

Reliability for backup power application

If primary power sources fail, Alcad batteries enable your backup system to provide vital systems support to keep operations moving until primary power is restored or a controlled shutdown can be performed, including for :

- UPS (Uninterruptible Power Supply)
- substation switchgear
- switching and transmission
- emergency and security
- industrial fire monitors and alarms
- process control
- signaling

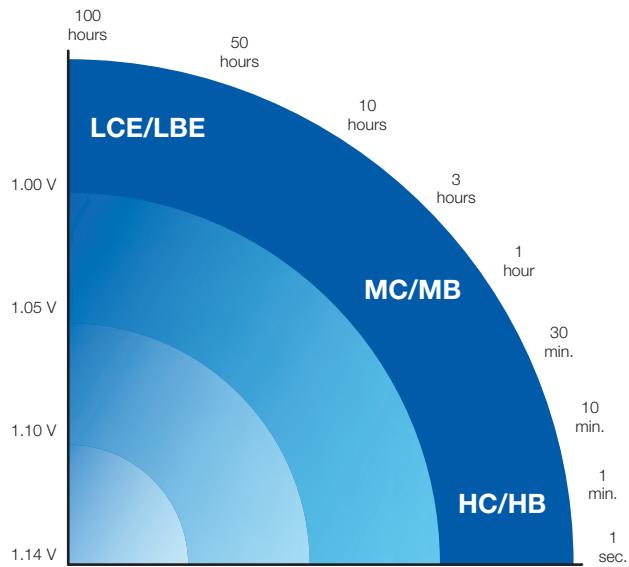

Security for starting applications

For generator starting or switching on heaters, pumps and other essential equipment in an emergency, Alcad batteries meet the specific need for high discharge, instant voltage recovery and reliable operation, even in extreme temperatures.

“

Alcad has a Single Cell range to suit every discharge profile from 1s to 100 h

”

A broad range of capacity and performance

Alcad Single Cells are available in low rate discharge, medium and high performance types LCE/LBE, MC/MB, HC/HB and offer:

- simple maintenance
- 20+ years design life
- wide temperature range operation
- resistance to electrical abuse, shock and vibration
- low life cycle cost

	LCE/LBE	MC/MB	HC/HB
Capacity steps	58	68	47
Capacity	10 - 1690 Ah	9 - 1440 Ah	9 - 920 Ah
Performance	For low rate discharge over long periods between 1 and 100 hours	For varied loads with low and high discharge rates between 30 minutes and 3 hours	For high rate discharge over short periods less than 30 minutes
Applications	Power back-up applications	Power back-up applications	Power back-up and starting applications

“

It is easy to specify the ideal battery for every stationary application, based upon required discharge time and end of discharge voltage.

”

Alcad Ni-Cd technology
robust and reliable by
design, proven in practice

Alcad's wide range enables the best solution for your application optimised according to plate thickness

LCE/LBE range

- Thickest plates
- High energy
- Low cost per Ampere at low rates

MC/MB range

- Thinner plates
- Medium power
- Optimised between H and L design for mixed loads

HC/HB range

- Thinnest plates
- High power
- Low cost per Ampere at high rates

- Optimised design boosts electrical performance by up to 10% depending on discharge time.
- More capacities than previous designs enables the battery to be sized more closely to exact requirements.

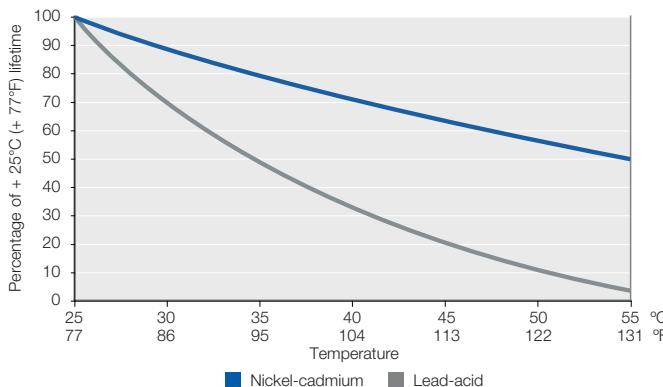

“ Improved performance and more capacities allow you to select the best, cost-effective battery for your application.”

Because it's Ni-Cd, it's reliable

Alcad's robust Ni-Cd pocket plate technology is particularly well suited to the complex requirements of installations in difficult and demanding conditions, and in remote and inaccessible locations.

- Delivers performance, reliability and a long, totally predictable service life, with no risk of sudden death failure.
- Ensures a 20+ years' service life at + 25°C (+ 77°F).
- Even at + 35°C (+ 95°F), service life is reduced by just 20% compared with a 50% reduction for a lead-acid battery.
- Operating temperature -20°C (to +55°C (

Effect of temperature on lifetime

Single Cell construction

- Steel pocket plate structure does not suffer from 'sudden death' or internal corrosion since there is no interaction between the active material and the electrolyte.
- Tough polypropylene casing ensures structural integrity throughout a long life.
- Specially designed flame arresting flip top vent ensures safe operation
- Engineered electrolyte solution delivers optimum performance without causing degradation of plate materials.
- Plenty of space is allowed for a good reserve of electrolyte.
- Special electrolyte is available for extremely low temperature applications.
- Single Cell batteries offer a long shelf life when stored under Alcad's recommended conditions and are easy to install.

1 Protective cover

In line with IEC 62485-2 / EN 50272-2 (safety) with IP2 level

2 Flame-arresting vent

Compliant with UL 1989 Section 7 - Flame arrester vent cap tests

3 Plate group busbar**4 Plate tab****5 Plate frame****6 Separating grids****7 Cell container****8 Alcad pocket plate technology**

Note: Alcad Single Cell ranges fully comply with the requirements of the IEC 60623 standard.

“

Demands in our industry change quickly. Through their strength and reliability, Alcad batteries enable us to deliver the high level service our customers expect.

”

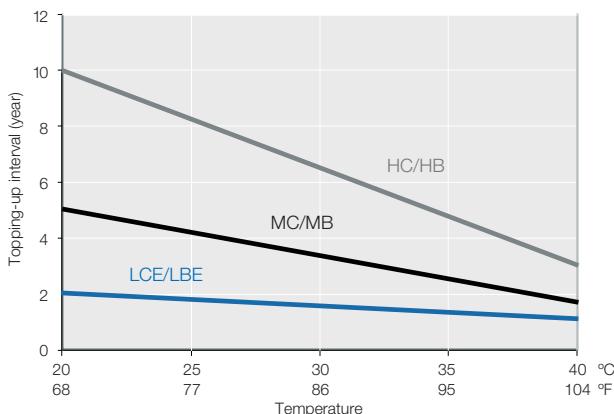

Extending and improving **battery** design to meet evolving industrial needs

Lower maintenance contributes to lower Total Cost of Ownership (TCO)

- Topping-up interval extended by up to two times in standard conditions at + 20°C (+ 68°F) and at float voltage.
- A simple annual maintenance inspection is recommended to check correct functioning of the charging system, battery and the auxiliary electronics.
- Easy maintenance built-in by design:
 - Visible electrolyte level
 - Simple bolted connector for fast installation and allowing the battery to be quickly commissioned.

Typical topping up intervals at recommended charge voltage

Higher chargeability to minimise downtime

- Faster recharge time enables at least 80% recovery of capacity from fully discharged conditions in 15 hours at float voltage level.

Recommended charging voltage:

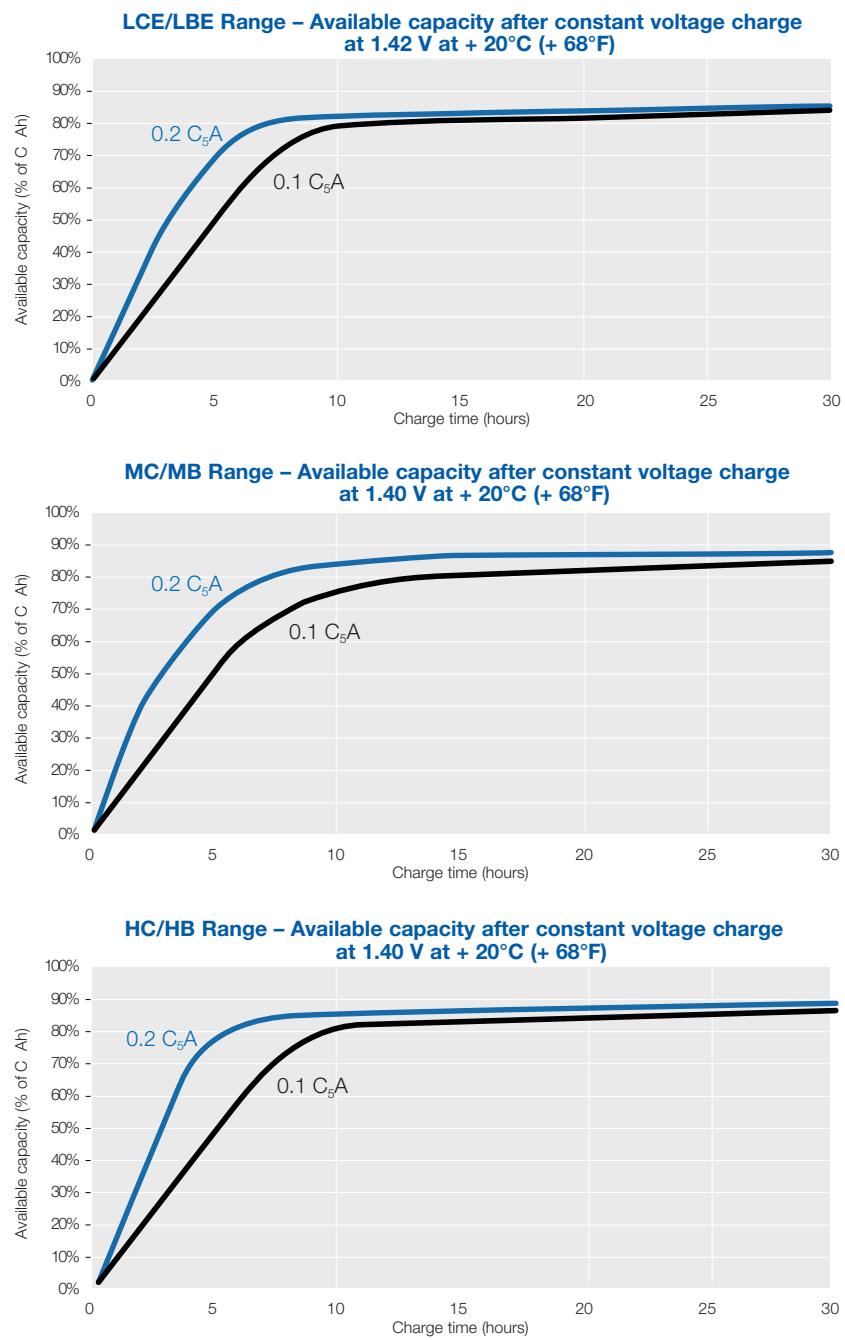

● For two level charge:

- Float level:
 - 1.42 ± 0.01 V/cell for LCE/LBE
 - 1.40 ± 0.01 V/cell for MC/MB and HC/HB

- High level:
 - 1.47 - 1.70 V/cell for LCE/LBE
 - 1.45 - 1.70 V/cell for MC/MB and HC/HB
- A high voltage will increase the speed and efficiency of the recharging.

● For single level charge:

- 1.43 - 1.50 V/cell.

Alcad design and build to ensure long, trouble-free battery life

Alcad Single Cell batteries comply with the highest quality, safety and environmental standards

Electrical characteristics:

- Certified IEC 60623 5th edition - Secondary cells and batteries containing alkaline or other non-acid electrolytes -Vented nickel-cadmium prismatic rechargeable single cells.
- Verified discharge performance at high temperature (TH = +70°C) and low temperature (TL = -30°C)

Quality:

- ISO 9001 and ISO 14001
- Alcad World class continuous program.

Safety:

- Complies with EN 50272-2/ IEC 62485-2 - Safety requirements for secondary batteries and battery installations - Part 2: Stationary batteries

The protective covers for terminals and connectors, the insulated cables are compliant with IP2 level protection against electrical shocks according to safety standard.

- Complies with UL 1989 - Section 7: Flame arrester vent cap tests - UL standard for safety for standby batteries.

Environment & recycling:

- Fully recyclable
- RoHS – Although batteries and accumulators are not within the scope of the RoHS directive, Alcad has taken voluntary measures to make sure that the substances forbidden by RoHS are not present in the battery, with the exception of the electro-chemical core.
- REACH – Alcad has adopted internal procedures to ensure conformity with the European REACH (Registration, Evaluation, Authorisation and Restriction of Chemical Substances) Regulation.

A through-life service philosophy

Alcad's stationary battery specialists provide global expertise, with local customer service, through an expanding network of approved service stations in the Middle East, Asia, Europe and North America. You can depend on our support for the entire life of your battery, and beyond, including:

- installation, customer installation certification, commissioning and start-up
- preventive maintenance
- inspection, troubleshooting, testing and supervision
- corrective maintenance
- end of life removal, decommissioning and recycling
- training programmes for technicians and engineers

“
Alcad's total end-to-end application support is a vital and dependable resource for our organisation.
”

The screenshot shows the BaSiCs software interface. At the top, there's a toolbar with various icons. Below it is a header bar with the Alcad logo and the text "BaSiCs Battery Sizing and Configuration System". The main window has a title "SYS00001 - IEEE/UPS sizing". It contains two tabs: "Step 1 - General" (selected) and "Step 2 - Profile". Under "Step 1 - General", there are input fields for "Minimum system voltage", "Nominal system voltage", "Maximum system voltage", "Min. system voltage (%)", "Max. system voltage (%)", and "Charge temps (%)" (with options for "Single level IP" or "Dual rate"). There are also dropdowns for "Nominal temperature", "Maximum temperature", "Design margin", "Aging factor", and "Temperature compensation". A "Range" section shows values for "LOE", "LD", "M", "MD", "H", and "PH". Below these inputs is a note: "The field is required." and "Results: Compare the IEEE 1185 battery sizing with the battery aging after charge at complete charge." A "View" button is next to this note. At the bottom of the window, there's a table titled "Results" with columns for "Cell type", "Cells number", "Rated capacity (Ah)", "Required capacity (Ah)", "Rated voltage (V)", "Typical voltage (V)", "Battery weight (kg)", "Battery footprint (mm²)", "Battery volume (mm³)", and "Ratio". The table shows one row for "Packs/Unitized battery" with values: "MC200F", "31", "285", "277.08", "127", "2.9", "1450.00", "2.13", "2.02", and "1".

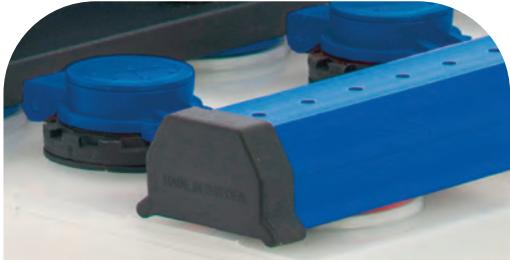

Size your battery solution

Our fast and easy to use Battery Sizing and Configuration System (BaSiCs) software support tool for stationary applications is available for download. This will help you find the right battery and create the optimum battery layout for your backup or starting application.

The best connection for optimum battery efficiency

Standard layouts

Alcad has developed a series of standard layouts in which a battery may be ordered. Whether the battery is being installed on a rack, in a cabinet or is simply freestanding, the same configuration principles can be applied.

Two ways to configure the battery

	Normal connection	Crosswise connection
LCE/LBE	LCE10P to LCE375P	LBE400P to LBE1690P
MC/MB	MC9P to MC335P	MB350P to MB1440P
HC/HB	HC9P to HC210P	HB230P to HB920P

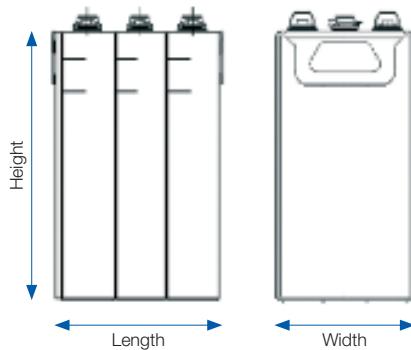

A diagram showing a 3x10 grid of battery cells. The top row is connected in series, indicated by a red circle with a plus sign (+) at the end. The bottom row is connected in series, indicated by a blue circle with a minus sign (-) at the start. A double-headed arrow below the grid indicates a "Length-to-length connection".

A photograph of a white rectangular battery rack unit. It has four blue battery modules mounted vertically. The brand name "ALCAD" is printed on the front panel.

A diagram showing a 3x10 grid of battery cells. The top row is connected in series, indicated by a red circle with a plus sign (+) at the end. The bottom row is connected in series, indicated by a blue circle with a minus sign (-) at the start. A double-headed arrow below the grid indicates a "Width-to-width connection".

A photograph of a white rectangular battery rack unit. It has four blue battery modules mounted horizontally. The brand name "ALCAD" is printed on the front panel.

The cell is turned through 90° and then connected width-to-width – “crosswise” mounted. This minimises the installation’s overall length. The cell’s width is used to calculate the row length.

Dimensions

The dimensions of all available cell types are tabulated on the following pages.

Notes:

- All the tabulated dimensions are maximum values.
- All the cell heights given in the tables include the height of the IP2X terminal cover.

Position of terminals

Single cells, 1 pole bolt per pole

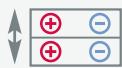

LCE10P to LCE280P
MC9P to MC240P
HC9P to HC155P

Single cells, 2 pole bolts per pole

LCE10P to LCE375P
MC250P to MC335P
HC170P to HC210P

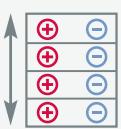

Single cells, with 2 – 6 pole bolts per pole

LBE400P to LBE550P
MB350P to MB480P
HB230P to HB305P

LBE600P to LBE830P
MB505P to MB720P
HB325P to HB460P

LBE890P to LBE1100P
MB740P to MB940P
HB510P to HB615P

LBE1150P to LBE1400P
MB1000P to MB1180P
HB640P to HB765P

LBE1450P to LBE1690P
MB965P
MB1220P to MB1440P
HB800P to HB920P

Label naming information

LCE/LBE, MC/MB and HC/HB single cell ranges are respectively designated with a “-1” extension on ALCAD container labels. The “-1” extension designation refers to ALCAD single cell design for manufacturing purposes. As an example, ‘LBE 750P’ cell is named as ‘LBE 750P-1’ on the ALCAD container label.

Single Cell Range

LCE / LBE Range

Single Cell Range

LCE / LBE Range

Performance after prolonged float charge of fully charged cells
Available Amperes at + 20°C ± 5°C (+ 68°F ± 9°F)

Final voltage: 1.10 V/cell

Cell type	Capacity C ₅ Ah	Hours							Minutes							Seconds

Single Cell Range

MC / MB Range

Performance after prolonged float charge of fully charged cells

Available Amperes at $+20^\circ\text{C} \pm 5^\circ\text{C}$ ($+68^\circ\text{F} \pm 9^\circ\text{F}$)

Final voltage: 1.05 V/cell

THE ALCAD PLANT IN OSKARSHAMN, SWEDEN HAS ITS OWN IN-HOUSE RECYCLING FACILITY

A responsible corporate citizen

Alcad is committed to protecting and preserving the environment. We are engaged in a sustained effort to use resources responsibly and to act in a way that clearly demonstrates our great respect for the planet.

Alcad LTD has set up a network of Bring Back Points (BBPS) which receive end-of-life nickel based batteries from end users free of charge. These batteries are then shipped by these BBPs to our recycling facility in Sweden or to fully permitted recycling companies, in compliance with the laws governing trans-boundary waste shipments.

The recycling efficiency of these recyclers exceeds 75% of the nickel based battery weight (a level which exceeds the mandated recycling efficiency of 65% applicable to lead-acid batteries), and recycled materials are reused as secondary raw material for industry.

This network of Bring Back Points comprises over 30 entities, and provides services in all of our major markets in Europe, North America, Asia and Africa. The list of BBPs and their contact details are available on the Alcad website.
